Dynamic Data and Capabilities in IPFS Working Group

`irc` `#ipfs-dynamic-data`

> Research and development of building blocks that enable collaborative applications, providing solutions for security, identity, access control, concurrency, synchronization, offline and near-real-time collaboration on top of IPFS.

Responsibilities include

Research and implement CRDTs on top of IPFS, creating building blocks that can be used by other applications.

Research Cryptographic ACLs (Capabilities Systems) and create building blocks that implement. Apply this research and

Current Endeavours

- Engineering and Product Development:
  - JS libraries for CRDTs (CmRDTs, δ-CmRDTs)
  - Peer-*
  - PeerPad
